MICHAEL J. CHAPPELL (Coventry, England)	
Structural Identifiability of Models Characterizing Saturable Binding: Comparison of Pseudo-Steady-State and Non-Pseudo-Steady-State Model Formulations . . . . .	1
FRANK M. J. VAN DER LINDEN (Eindhoven, Holland)	
Creating Phyllotaxis: The Stack-and-Drag Model . . . . .	21
LAURENT CLARET AND ATHANASSIOS ILIADIS (Marseille Cedex, France)	
Nonparametric Density Estimation Applied to Population Pharmacokinetics . . . . .	51
J. D. H. SMITH (Ames, Iowa)	
Competition and the Canonical Ensemble . . . . .	69
COLLEEN KELLY (Kingston, Rhode Island) AND JOHN RICE (Berkeley, California)	
Modeling Nucleotide Evolution: A Heterogeneous Rate Analysis . . . . .	85
SHIN-HO CHUNG AND RODNEY A. KENNEDY (Canberra, Australia)	
Coupled Markov Chain Model: Characterization of Membrane Channel Currents with Multiple Conductance Sublevels as Partially Coupled Elementary Pores . . . . .	111
DIANA MARIA THOMAS, TERRY WAYNE SNELL, AND SAYED MURTAZA JAFFAR (Atlanta, Georgia)	
A Control Problem in a Polluted Environment . . . . .	139
MIRJAM KRETZSCHMAR (Bilthoven, The Netherlands), AND MARTINA MORRIS (New York, New York)	
Measures of Concurrency in Networks and the Spread of Infectious Disease . . . . .	165
A. G. RIGAS (Xanthi, Greece)	
Estimation of Certain Parameters of a Stationary Hybrid Process Involving a Time Series and a Point Process . . . . .	197
